REUSABLE MASKS

HOW IS CORONAVIRUS

TRANSMITTED?

The virus lives in droplets of water in an infected person's respiratory system.

If they sneeze, cough or touch their mouth, these particles can spread.

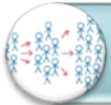

These particles can then land in the mouths or noses of uninfected people.

The coronavirus particles can then even be inhaled.

Why We Should Wear a Mask?

University of California San Francisco (UCSF) Health support the use of face masks or face coverings. Reasons UCSF Health support the use of face masks:

The highly contagious nature of the virus

The potential for asymptomatic and pre-symptomatic transmission

Empiric evidence from Asia, where masks are routinely used

Supplies of hospital-grade masks for health care workers must continue to be a priority, but extra surgical masks or homemade masks of multilayered cotton will likely provide more protection compared to wearing nothing during this epidemic

An increasing number of cities in the U.S. are embracing this recommendation : "**Stay in place, keep your space, and cover your face**"

Advantage of Reusable Masks

Less Biological Waste

Less Delivery Load

More Comfort

STOP SPREADING WITH REUSABLE MASK

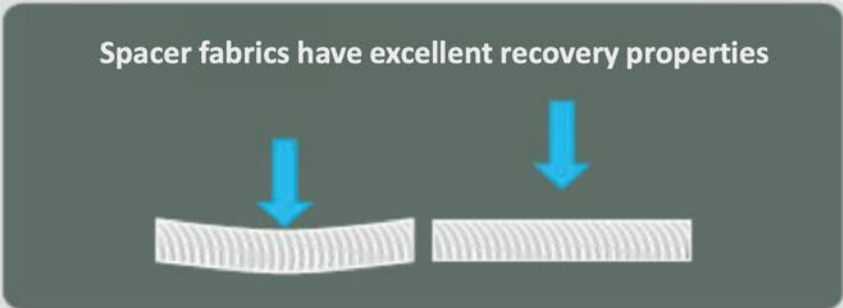

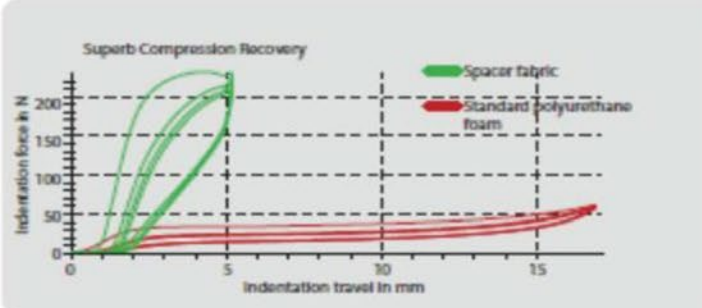

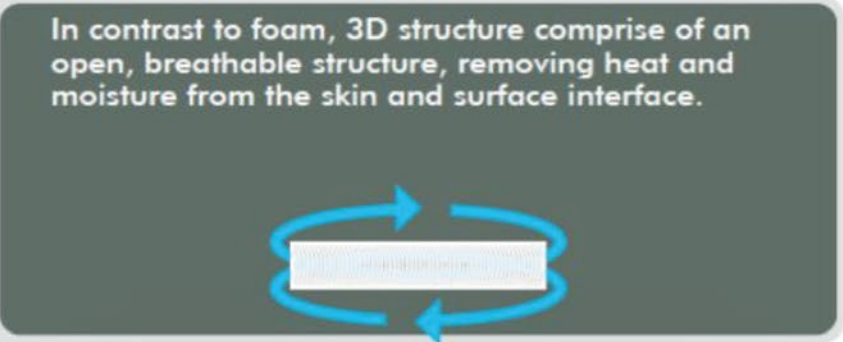

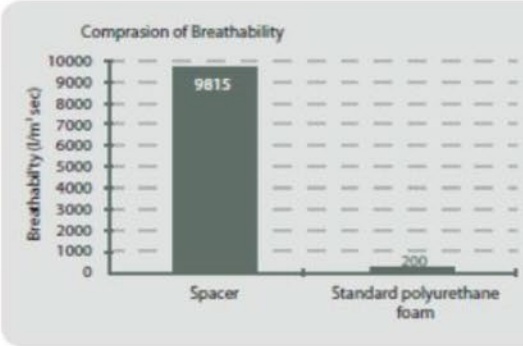

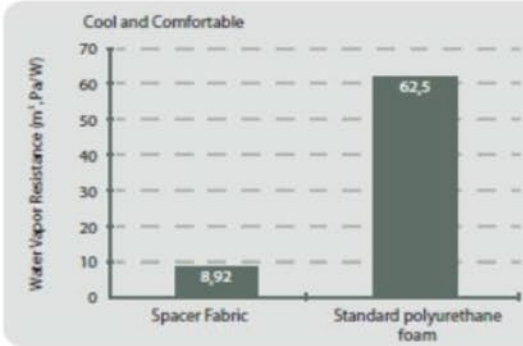

- Anyone could be a carrier of COVID-19 and not know it.
- You play a role in protecting the community against COVID-19.
- This mask does not replace healthcare settings and should not be used when caring for those with COVID-19.
- This mask is one way to combat the virüs. Social distance, handwashing and other cloth face coverings recommendations should also be followed.
- If skin irritation occurs, immediately stop using the mask. If irritation persists, consult your primary care provider.
- Be mindful when wearing this product if you have lung disease, like emphysema, or chronic heart disease. Stop using this product if you notice difficulty breathing while wearing it.
- Machine wash warm, unlimited times before discarding. Tumble dry high. Do not use bleach, chemicals or disinfectant to wash this product.

Warning

To avoid suffocation, keep this plastic bag away from babies and children.

Please throw bag to plastic waste bin.

Advantage of 3-D Spacer Fabrics

- Cotton fabric is breathable and keeps the face cool and dry.
- Cotton is soft and easily stretches making it a comfortable fabric to wear. Due to its softness and comfort, it is often used in underwear and undershirts.
- Cotton has a high tensile strength, making it strong, durable and less likely to rip or wear. It is 30 percent stronger when wet, withstanding many washings in hot water.
